## **DETAILED ACTION**

### ***Drawings***

1. The informal drawings filed in this application are acceptable for examination purposes. When the application is allowed, applicant will be required to submit new formal drawings.

### ***Election/Restrictions***

2. Applicant's election without traverse of the species as depicted in figure 1 and read on by generic claim 1 as set forth in Paper No. 5 on 8/28/03 is acknowledged.

### ***Specification***

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Bailleul.

Bailleul discloses a picture encoding system conversion device (Bailleul: figure 7) comprising: a decoder receiving picture codes, compressed in information volume, from a reception side transmission channel via an input buffer and expanding the received picture codes to output expanded picture codes (Bailleul: column 9, lines 25-30); an encoder compressing the picture codes, decoded by said decoder in information volume, to generate picture codes to output generated picture codes from an output buffer to a sending side transmission channel (Bailleul: column 9, lines 35-54); and a transcoder controller controlling said encoder (Bailleul: column 10, lines 1-25); wherein said transcoder controller includes an input buffer monitor monitoring said input buffer of said decoder (Bailleul: column 8, lines 35-55); an output buffer monitor monitoring said output buffer of said encoder (Bailleul: column 8, lines 5-28); and quantization step controller modifying a quantization step in compression processing of said encoder based on information from said input buffer monitor and said output buffer monitor (Bailleul: column 10, lines 35-67), as in claim 1.
